

Hello Lovers!

PRICE GUIDE

Welcome!

Thank you for your interest in my photography services! The info included in this packet is to help with any questions you have about the services that I offer. Please feel free to contact me with any other questions you have. I look forward to connecting and discussing the details of your day!

Congratulations on your upcoming wedding! Photography is one of the most important decisions you will make while planning your wedding. I have been shooting weddings in the Washington DC, Maryland and Virginia areas for about 20 years. I have a vast amount of experience handling the stresses, joys and emotions that come with this most important day in your life. I love documenting these moments and bringing out your personalities, and the magic that happens between you and your partner.

Please feel free to contact me so we can chat!
We can either talk via phone, Zoom or Facetime to discuss the details of your day. I can talk anytime - let me know what works for you.

I require a 50% deposit to hold your wedding day for you. Any deposit is not refundable. Sometimes wedding dates get changed and I will work with you to adjust things if needed. The remainder of your balance is due on or before your wedding date. I accept personal checks and Zelle for payment.

The album that is included in your package is an 8 x 8 album with 1 image on each page. After your wedding you can mark your favorite images and then let me know when you are ready to order. It usually takes about 2 months for the album order - from start to finish. I also offer larger custom albums that have layouts and fabric covers. Cost depends on how many images and the size of the album. An average large album with about 80 images in it would be about \$1400.00.

The Pass Gallery that is included in your package is a wonderful way to share your images with family and friends. Once you download the App on your phone you can view your images, download a full resolution image directly to your photos on your phone and post it on Facebook or Instagram if you like. I ask that you don't alter my images in any way - I custom edit them to look their best and sometimes applying filters, etc, doesn't represent my style of photography.
